E911 Phase II Location Technology Information

- 1) Type of Technology: Handset GPS solution
TELCORE-AirCore mobile switching center

- 2) Testing and Verification: The system will be tested by placing calls from locations across the service area and comparing the location information transmitted by the handset to a GPS test set.

- 3) Implementation Details and Schedule: The TECORE-AirCore MSC is scheduled to be upgraded for E911 by 7/1/01.

- 4) PSAP Interface: TELCORE-AirCore mobile switching center

- 5) Existing Handsets: All existing handsets are E911 capable.

- 6) Location of Non-Compatible Handsets: Not applicable.

- 7) Other Information: No PSAP Phase 2 requests received.
